

Active Directory Manager Pro

CionSystems' **Active Directory Manager Pro** is a comprehensive management and reporting application designed to improve productivity, simplify IT environments and increase security, while proving compliance.

ZERO DOWNTIME

CionSystems Active Directory Manager Pro is browser-based, 100% Web enabled. You can access it from anywhere, anytime.

POWERFUL REPORTS

CionSystems Active Directory Manager provides users with compelling and flexible reporting capabilities. More than 200 ready-made reports are available. Additionally, users can create custom-built reports to meet their own particular needs. Furthermore, all these reports can be e-mailed to anyone at any time, making this the most robust solution available today.

SEARCH AND REPLACE

Using this enhanced functionality Administrators can change object properties in seconds.

Active Directory is at the heart of all Windows networks in any enterprise environment. All Microsoft enterprise applications depend on Active Directory. Efficiently managing the Windows Active Directory is becoming very challenging for every IT Administrator. Creating users manually and configuring their security permissions is error prone and time consuming, particularly in complex windows networks.

CionSystems Active Directory Manager offers an efficient and easy to use web-based solution to meet your Active Directory management requirements. It allows you to create or modify multiple users by simplifying the complexities present and adding new functionality to the native tools.

KEY FEATURES

- 100% Web enabled
- Supports multiple Domains
- Microsoft Exchange Server Management
- Bulk Exchange User creation
- Role-based delegation
- Customizable Dashboard views
- Bulk object creation and modification
- Search and Replace
- Site, Schema, Group Policy Management
- Password Management
- ACL Management
- Contact Management
- Automatic report scheduling & delivery
- 200 built-in reports
- Hundreds of Custom Reports

For every IT organization, identity and access management is far more than just a security issue. It is critical to ensure that the appropriate permissions are in place for all users and applications. Building and managing the identity strategy can be complex because it touches all users, applications, company resources and customers.

The majority of enterprises face challenges in maintaining consistent policies, thereby incurring high administrative cost and having a direct impact on data security and compliance requirements.

ENHANCED SECURITY

Our Identity and Access Management solution allows you to establish and enforce consistent policies across all your domains. Reduce number of domain administrators and other high privilege accounts.

MICROSOFT EXCHANGE

CionSystems can help maximize your investment in Microsoft Exchange and other applications with our reporting solution.

TURN KEY SOLUTIONS

CionSystems Active Directory Manager benefits organizations by allowing them to control the Identity and Access Management across all domains and by offering solutions not available natively.

Benefits

CionSystems provides an easy to use & efficient way of managing all aspects of your organization's Active Directory. Here are some of the ways you can benefit from CionSystems Active Directory Manager:

- It's flexibility allows you to accurately respond to the frequent changes in the enterprise
- The Delegation feature reduces and simplifies the work Administrators are required to do
- Customizable templates increase functionality & ease of use by assigning specific features to objects within
- The powerful reporting capabilities satisfy all your needs and compliance requirements
- You can centrally manage all users, groups and objects across multiple domains
- Manages and automates the provisioning process across all domains to eliminate costly errors
- Customizable Dashboard view allows one-click access to the essential information important to you
- The easy to use interface makes creating and managing objects a snap, with no need for scripting
- In-depth Microsoft Exchange management tools are available to streamline repetitive tasks
- Bulk import and export features save time and allow you to create identical changes virtually error-free

Role-Based Delegation

Improve security by easily reducing number of high privilege accounts. CionSystems Active Directory Manager provides role-based delegation, which lets the Administrators give access to other users based on their role within the IT Organization. This allows the Administrators to delegate down responsibility throughout the department, thus freeing their time for other more important tasks. The level of control being delegated can be specified through the use of roles.

Take the next step

Active Directory management is critical to your organization's productivity. Make sure you are in control of your network. CionSystems products can help you achieve maximum productivity and streamline your processes. Contact us today for an in-depth analysis of your Active Directory needs.
