Active Directory Manager Pro 5.0 brings significant enhancements to an already impressive array of capabilities. The ADM PowerShell Console allows users to create, run, save, and modify scripts. The PowerShell scripting workspace lets users create or leverage existing office365, AD, Local exchange and Exchange online.

Many new compliance and governance centric features are now part of Active Directory Manager Pro 5.0, including attestation for user and groups, date range bounded reports, de-provisioning, and more!

Active Directory Manager Pro 5.0 supports all LDAP capable directory services, such as OpenLDAP, Radiant Logic, ViewDS, Novel, IBM Security Directory Server, and any other LDAP compliant service or server. Active Directory Manager Pro 5.0 includes a separate LDAP console for persisting connections and search filters, as well as performing object creation, modification, and deletion. This includes operations on groups and their memberships.

The Search & Manage, options now exist to search accounts based on date ranges. Other search enhancements include wildcard searches, searching deleted objects in the archive and searching for data in reports.

User management and reporting now include last Login and primary group. Further, SID history is now be removed, supporting security hardening and migration activities.

Active Directory Manager Pro 5.0 now supports provisioning and de-provisioning. There is also a csv based de-provisioning capability. Additional Enhancements include enhanced detail in the displays and reports, searchable reports, enhanced schema management functionality, the ability to scope access based on OU, customizable dashboards, and OU based workflows.

Active Directory Manager Pro 5.0's significantly expanded Exchange 2010 & 2013 management's new capabilities include:

- Connect mailbox
- New MailboxExportRequest
- Resume MailboxExportRequest
- Remove Mailbox Export Request
