

Case Study: Cloud Office 365 Large Tech Company

“We realized a rapid ROI. Deployment was fantastic! We did NOT have to add or change anything in our current Infrastructure.”

SVP of Operations,
International Tech Company

Large International Tech Co.

- **Over 35,000 User Accounts spread over Multiple Domains in over 50 countries**
 - Users Consist of Employees, Customers, Vendors, Contractors, Suppliers, etc.
 - Each Group was Governed by Different Policies and Regional Regulatory Requirements for Passwords
- World-Wide Initiatives Mandated Complete Privacy and Security
- **Needed to Move to the Cloud and Adopt Microsoft Office 365/Azure AD without Impacting On-premise Infrastructure**
- Wanted to Use the Cloud Identity Store (Azure AD) for new enterprise Applications without subscribing to Microsoft Premium Services

The Problem

- Current Domain Could NOT be Synced or Migrated Without Major Cleanup
- No Mechanism for Syncing Non-AD Domains
- **Expensive SaaS Applications Integration with Azure AD**
- Lack of Automation and Flexible Toolset Caused Massive Amount of Manual Man-Hours and Exorbitant Costs
- Administration was Tedious, Cumbersome, Prone to Errors, and Time-Consuming
- Compliance Issues Required Many Manual Labor-Intensive Man-Hours
 - Resulted in Many Mismatched AD Object Relationships
 - **Resolving Object Links Issues was Very Difficult**
 - **Tools were Rudimentary and Lacked Visibility**

WHAT IS CLOUD OFFICE 365?

A Complete Suite for increasing productivity, security, and compliance. Simplifies the management and synchronization of On-Premise AD or OpenLDAP to Microsoft Office 365 and Azure AD.

Easy Office365 and Azure AD management and SSPR

Do it all in the fastest, easiest, most efficient, and secure way with Cloud Office 365.

Case Study: Cloud Office 365 Large Tech Company

“We realized a rapid ROI. Deployment was fantastic! We did NOT have to add or change anything in our current Infrastructure.”

SVP of Operations,
International Tech Company

The Solution

- DirSync's Automated Migration with Audit Trails from non-Microsoft LDAP to Office 365/Azure AD
- Rapidly and Easily Deployed Cloud Office 365 in Stages
 - Configured and Provided Access to World-Wide Users
 - Effectively Managed Users, Computers, Groups, etc.
- User Self-Service Capabilities Include:
 - Registration and Self-Management
 - Single and Multi-Factor Authentication (MFA)
 - Self-Service Password Reset (SSPR)
 - Self-Group Membership Management
- SaaS and Web Applications Integrated via the Proxy Authentication Function
 - Simple, Easy and Did NOT Require Changes or Additions to Their Infrastructure
- **Ensures License Management is Optimal**, Lowering Costs Eliminating Straggling Licenses
- **Point-and-Click Features Saves Hundreds of Man-Hours**
- **Incredible Cost Savings with Rapid Deployment**
- Optimum Backup and Restore Capabilities
- **Auditing/Reporting with Automatic Change Notification for All Group Policies, etc.**

WHAT IS CLOUD OFFICE 365?

A Complete Suite for increasing productivity, security, and compliance. Simplifies the management and synchronization of On-Premise AD or OpenLDAP to Microsoft Office 365 Cloud and Azure AD.

Easy Office365 and Azure AD management and SSPR

Do it all in the fastest, easiest, most efficient, and secure way with Cloud Office 365.
