

# AD Guardian: Overview

## WHAT IS AD Guardian?

---

A Complete Suite for Managing Identity Access and Authentication for Enterprises.

Provides all aspects of Management, Self-Service for a variety of operations including: Self-Service Password Reset (SSPR), Change Management, Disaster Recovery, Group Policy Objects (GPOs) and a Deep Insight into Complex Active Directory (AD) Information.

Easily Harden the Most Important part of your Infrastructure and Protect your Enterprise from Hacks, ID Theft, Loss of Critical Data, etc.

One Solution Manages ALL Enterprise AD Activities!

---

*"AD Guardian helped our team become very efficient in closing the most vulnerable weak spots in our digital transformation."*

**- CISO, Large Bank**

## Overview

Active Directory (AD) is the most important component of your infrastructure. Since WannaCry, we've seen exponential attacks against AD servers. Time to protect your most valuable assets against:

- Privileged Credential Attacks, Shadow Admin Accounts, Stale Accounts and Credentials.
- Poorly Implemented Group Policies and Poorly Managed Groups and Group Memberships
- Major Disasters

## Solutions:

- Disaster Protection and Recovery, Password Policies, Change Tracking and Alerting
- Securely Manage – Groups, Accounts, GPOs, and Policies with Auto-Sync

## Features

- Centralized Administration and Management
- Easily Give Restrictive Access.
- Attestation of Users and Groups Via a Web Interface
- End-to-End Group Policy Management with Several Out-of-the-Box Policy Templates
- Policy Based Automated User and Access Provisioning and Deprovisioning Integrated with Enterprise HR or SIS Systems
- Password Management, SSPR, Disallowed Password Dictionaries Password Syncing to Many Targets
- Self-access Management with Workflow and Audit Trail
- Disaster/Recovery Protection: Forest, Domain or Single Attribute
- 400+ Reports Meeting Audit and Compliance for: HIPAA, SOX, PCI, GLBA, ITIL, etc. (Premise and Cloud Objects)
- Easily Deploy Multi-Factor Authentication
- Harden your AD Domain and Servers with a Click of the Button.
- One Solution Manages ALL Enterprise AD Activities!
