

## CionSystems Entra ID Auditor & ADGuardian

Complete Audit, Protection, and Recovery for Microsoft Entra ID & Office 365

### The Challenge

Microsoft Entra ID (Azure AD) is the backbone of access to Office 365 and Azure apps. But out-of-the-box tools make it difficult to:

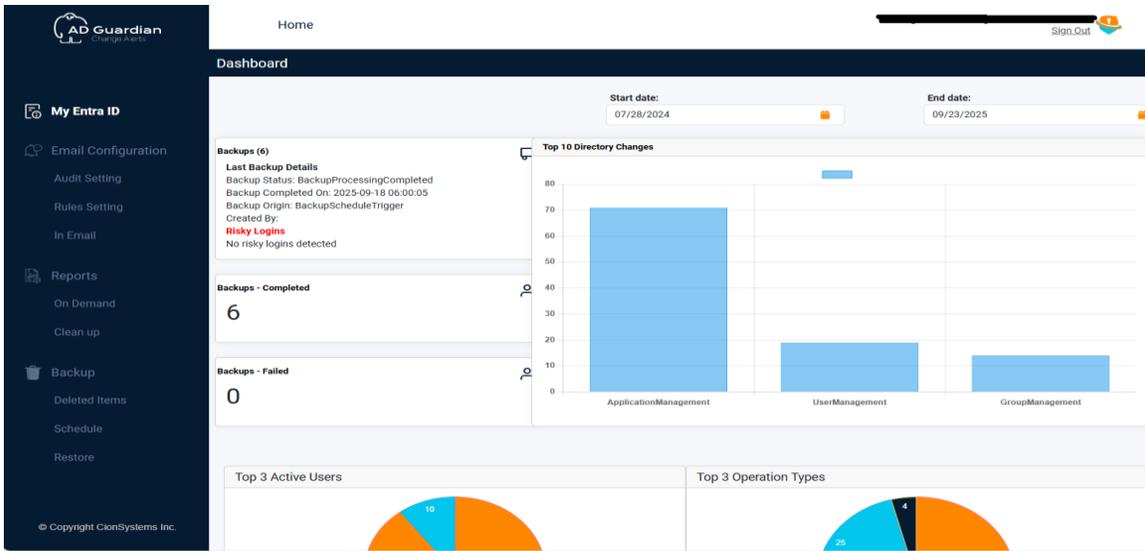

- Track changes and risky activity
- Prevent ransomware and insider threats
- Quickly recover from mistakes or attacks

In hybrid environments, the risk doubles exposing organizations to breaches, compliance failures, and costly downtime.

### The Solution

CionSystems Entra ID Auditor and ADGuardian deliver 360° visibility, real-time threat detection, automated remediation, and one-click recovery giving you the protection Microsoft recommends but doesn't provide natively.

## Key Benefits

Total Visibility: Audit every user, group, role, and privilege change.

Real-Time Defense: Continuous monitoring, risky login detection, and instant account lockdown.

One-Click Recovery: Instantly undo unauthorized or accidental changes from a single attribute to an entire domain.

Compliance Made Simple: Retain history as long as needed for SOC 2, HIPAA, GDPR, or internal audits.

Hybrid Security: Protect both on-prem Active Directory and cloud Entra ID with one solution.

The Backup configuration page allows users to set up a backup schedule and view a history of backup operations.

**Backup Schedule Configuration:**

- Backup-Frequency: Daily
- UTC hour to start the backup: 8
- No of Backup to Retain: 15
- Buttons: [View Schedule](#), [On Demand Backup](#)

**Backup History Table:**

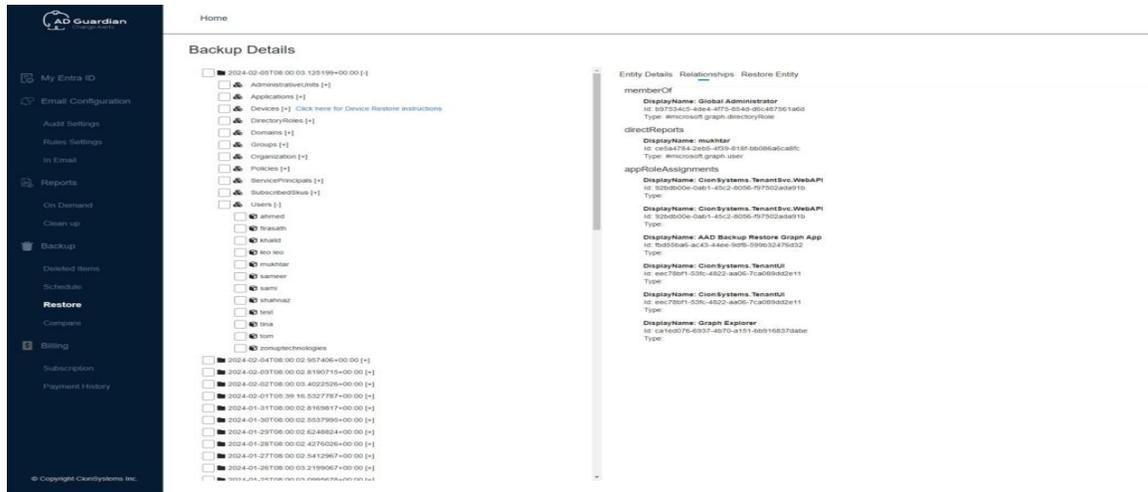

Status	Created Date	Completed Date	Is Processed	Is Deleted	Processed Date	Backup Processed Date	Origin	Created By
BackupProcessingCompleted	2/5/2024 8:00:03 AM +00:00	2/5/2024 8:00:51 AM +00:00	True	False	2/5/2024 8:00:37 AM +00:00	2/5/2024 8:01:00 AM +00:00	BackupScheduleTrigger	
BackupProcessingCompleted	2/4/2024 8:00:02 AM +00:00	2/4/2024 8:01:18 AM +00:00	True	False	2/4/2024 8:01:02 AM +00:00	2/4/2024 8:01:23 AM +00:00	BackupScheduleTrigger

# Easy Recovery

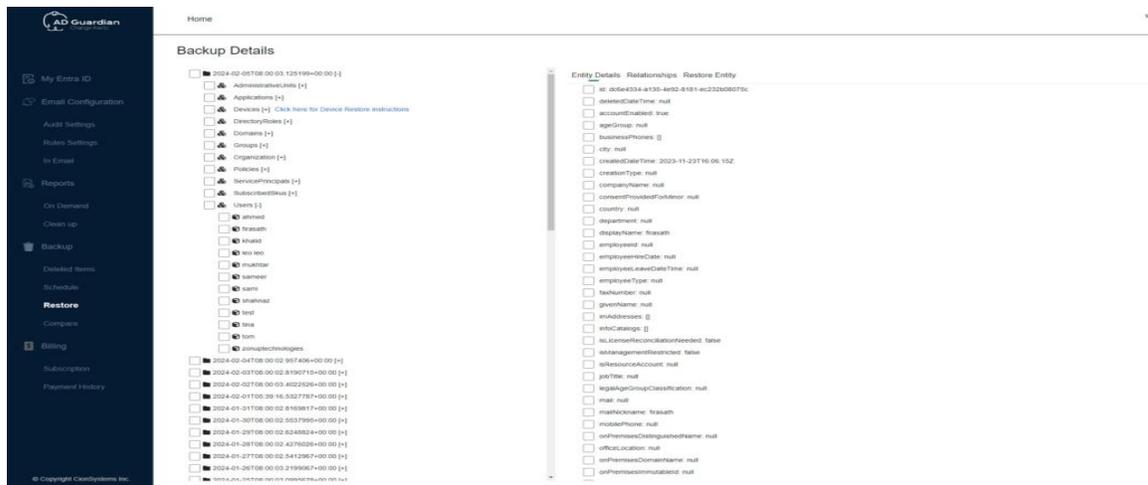

Human errors, ransomware, and insider threats can take down your directory. CionSystems Easy Recovery lets you:

- Recover users, groups, memberships, or attributes — instantly
- Bulk-restore multiple objects or entire domains
- Compare backups to quickly spot differences
- Protect cloud-only objects like M365 groups, Azure B2B accounts, and conditional access policies

# Why CionSystems

With decades of identity security expertise, we built a solution that goes beyond alerts — it detects, protects, and restores with a click.

## Take Control of Your Entra ID Security
